Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3751

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,698,619. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application claims are broader than the patent claims wherein it would have been obvious to one of ordinary skill in the art that limitations could have been omitted from the patent claims for the purpose of obtaining broader legal coverage of the invention.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-10, 13 and 14 rejected under 35 U.S.C. 102(b) as being anticipated by Horino et al. Horino discloses a bag in drum dispenser including a parallelepiped

overpack 2, a three dimensional liner 8 that is made from 0.005 inch thick polyethylene (see col. 2, lines 19-33, and col. 1, lines 34-41).

5. Claims 1-3, 11 and 12 rejected under 35 U.S.C. 102(b) as being anticipated by Lang-Ree et al. Lang-Ree discloses a bag in drum dispenser including a parallelepiped overpack 10 that is stackable as shown in figure 9 and can be in an array as shown in figures 17 and 18, and a three dimensional liner 32 as shown in figure 16.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4-10, 13, 14 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lang-Ree et al. in view of Horino et al. Lang discloses a bag in drum food dispenser substantially as claimed but does not disclose the material and the thickness of the bag. However, Horino teaches another bag in drum food dispenser having the bag made from polyethylene material that is 0.005 inches thick (see col. 2, lines 19-33, and col. 1, lines 34-41) for the purpose of providing the bag with a well known, convenient and safe material for holding and dispensing food products. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the apparatus of Lang-Ree with a polyethylene material of 0.005 inches thick as, for example, taught by Horino in order to provide the bag with a well known, convenient and safe material for holding and dispensing food products.
